2007 EPA Engine Tell-Tales

When you see this:

Regeneration Lamp (DPF) (Yellow)
Tell-tale illuminates when a regeneration is required. Tell-tale is OFF during regeneration.

High Exhaust Temperature Lamp (HET) (Yellow)
This Tell-tale will illuminate when the coach is moving less than 5 mph (approx.) and the exhaust outlet temperature exceeds the predetermined level.

Malfunction Indicator Lamp (MIL) (Red) (on DDC engines ONLY)
Malfunction Indicator Tell-tale Lamp. Tell-tale indicates a failure of an emission system component.

➔ Engine derated, regeneration required. Increase speed above 5 mph or perform stationary regeneration within 30 minutes.

➔ Engine derated or shut down engaged. Regeneration locked out. Service required. Contact authorized service center.

Driver Interaction

Do this:

➔ Regeneration is required within the next 5-6 hrs (if ON solid) or 1-2 hrs (if flashing). Drive the coach above 5 mph or perform stationary regeneration. Refer to the latest versions of MCI Service Bulletin 2963 for CAT C13, 2959 for Cummins ISM and 2964 for DDC S60 at www.mcicoach.com

➔ Nothing. Telltale is only active when coach is below 5 mph and in the regeneration process. When illuminated, the exhaust temperature is > 750° F (400° C). This telltale can be ON in conjunction with other telltales.

➔ Seek service from a Detroit Diesel service facility. Applicable to DDC Series 60 engines only.
